

ASSISTANT TEACHER FOR THE SUBJECT MATHEMATICS

Secondary School

Our Josef-Schwarz-School is situated close to nature in Erlenbach and centrally located in Heilbronn. Both campuses do not only share the bilingual concept and the state-of-the-art equipment and architecture, but also the intercultural spirit of the international school community. With the help of close cooperation within our interdisciplinary team, we promote a family-like and respectful coexistence on campus and create a living space for our students beyond school life - from reception to the Baden-Württemberg Abitur.

The Josef-Schwarz-School is part of the Phorms Education SE network of bilingual schools and nurseries, that has been enriching the educational landscape in Germany since 2006.

CHARACTERISTICS

Position:

Assistant Teacher for the subject Mathematics

Phorms location:

Baden-Württemberg

Contract:

part-time or full-time

Work language:

English

Earliest start date:

at the next possible date

Department:

Secondary School

OUR BENEFITS

- Possibility to help shape the lessons as well as a didactic concept based on individual support and bilingual teaching
- Small classes and courses (Oberstufenkurse) that allow for individual advancement
- Modern equipment in the classrooms
- An attractive salary with additional benefits such as a monthly public transport ticket and a free, freshly prepared lunch that changes daily
- Financial support in the event of a job-related change of residence and 30 days of holiday
- All paperwork completed and prepared for residency and work permits
- An open and cordial working atmosphere as well as a close cooperation in our international team
- Short-term provision of employee housing at market prices for a relaxed arrival in the region without a long search for accommodation
- An excellent location of the school in southern Germany, centrally located within Europe

YOUR TASKS

- Supporting teachers with day-to-day lesson-related tasks
- Observation and support of students in class and regular monitoring of their progress
- Communicating with parents, colleagues and external organisations
- Collaboration with the teacher in the classroom as well as support for individual students

YOUR PROFILE

- Bachelor or Master degree in Mathematics, Engineering, Applied Sciences or strong understanding of mathematics due to similar training/experiences
- Passionate about working with young adults as well as working in an international setting, ideally with experience working in a school setting
- Fluency in German and native-level English proficiency
- Identification with our pedagogical concept and motivation to creatively implement it together in a team
